**IPLOCKS TO PRESENT AT SHARE SYSTEMS MANAGEMENT SYMPOSIUM**

**SAN JOSE, Calif. – February 28, 2005** – IPLOCKS™, the leading provider of enterprise information risk management solutions, today announced that Glinda Cummings, Director of Product Management for IPLOCKS, will speak at the SHARE Systems Management Symposium. The symposium began Sunday February 27 and runs through Friday, March 4 at the Anaheim Hilton in Anaheim, California.

Ms. Cummings' speech is titled "Vigilance at the Source - Database Security That Never Sleeps" and will describe the requirements for database monitoring that help businesses strike a balance between productivity and controls. Attendees will learn how to identify key methods of ensuring database protection including: continuous, automated auditing and monitoring of database privileges, database security parameter settings, transaction monitoring, user behavior trends and access usage.

**SESSION:** Vigilance at the Source – Database Security That Never Sleeps  
**PRESENTER:** Glinda Cummings  
**DATE:** Tuesday, March 1, 2005  
**TIME:** 8:00 a.m. PST

Share is a non-profit organization dedicated to improving the effectiveness of information systems by providing education, influencing Information Technology strategies and encouraging mutual support. The SHARE User Symposium will provide educational information on: Business Continuity Planning, System Availability & Infrastructure Reliability, User Experiences, Security Vulnerabilities, Implementation Strategies: Best Practices, Cryptography & Encryption, and more.

**About IPLocks**

IPLocks, Inc. protects business continuity, safeguards company brand reputation and eases the pain of corporate governance by securing critical information assets from negligent and malicious acts. The IPLocks Information Risk Management Platform alerts management to information risks from security and business policy violations, attacks on data, compromised structural integrity and information theft, which other security solutions fail to detect. IPLocks secures business critical data for financial services, telecommunications, media services, healthcare, public utilities and other industries. Founded in 2002, San Jose, California-based IPLocks is a privately held global corporation with customers throughout North America, Asia Pacific, South America and Europe. For additional information, visit [www.iplocks.com](http://www.iplocks.com).
