**IPLOCKS TO PARTICIPATE IN 2005 TERADATA PARTNERS USERS GROUP
CONFERENCE AND EXPO**

SAN JOSE, Calif. – September 14, 2005 — IPLOCKS™, the leading provider of enterprise database security solutions, today announced its participation in the 2005 Teradata Partners Users Group Conference and Expo to be held September 18-22, in Orlando, Florida. The company also announced that Adrian Lane, Chief Technical Officer will be speaking on Thursday, September 22. IPLOCKS will be exhibiting in Booth #200.

“We are pleased to be a part of the Teradata Partners and Users Group Conference,” said Akio Sakamoto, President, CEO and Co-founder of IPLOCKS. “Our partnership draws on our expertise in database and information security and Teradata’s reputation as the leader in enterprise analytics and enterprise data warehousing. It’s exciting to continue to foster our combined efforts at the conference.”

IPLOCKS detects, analyzes and monitors database security policy violations, suspicious or malicious changes, structural integrity changes, as well as user access patterns to discern normal from negligent or malicious behavior. Designed specifically for high volume transactions, IPLOCKS provides a non-invasive, approach to comprehensive database

security through continuous monitoring transaction auditing and analysis in the context of the operation plus vulnerability assessment. All three solutions – monitoring, auditing and analysis plus assessment – provide a platform for implementing process monitoring and business controls required for regulatory compliance. This secures critical information from negligent and malicious acts and minimizes risks by alerting and reacting to threats. The IPLocks platform provides organizations with transparency in governance, compliance and incident resolution reporting to help minimize enterprise risk.

SESSION: Don't Become the Next Headline
PRESENTER: Adrian Lane, Chief Technical Officer
DATE: Thursday, September 22, 2005
TIME: 10:00 a.m.
