**IPLOCKS TEAMS WITH TERADATA TO PROTECT ENTERPRISES FROM  
INFORMATION THEFT**

***IPLOCKS Information Risk Management Platform Available for Teradata Warehouse  
Solution***

**SAN JOSE, Calif. – March 8, 2005** – IPLOCKS™, the leading provider of enterprise information risk management solutions, today announced a global alliance and technology partnership with Teradata, a division of NCR Corporation. The companies are joining forces to market and sell the IPLOCKS Information Risk Management Platform to Teradata data warehouse customers. These customers are increasingly looking to monitor the access of their databases, protect critical business information and ease the pain of regulatory compliance and audits.

IPLOCKS Information Risk Management Platform satisfies Teradata's customer vulnerability assessment and security monitoring requirements. The IPLOCKS / Teradata solution manages and monitors user access to critical information assets and enhances their security posture by preventing malicious and negligent use. IPLOCKS' auditing, behavioral analysis, content verification and security assessment capabilities are critical security management elements, enabling companies to easily enforce business best practices and security policies without altering their IT infrastructure.

“Information security is a top priority for global corporations who need to manage an increasingly vast amount of data in an easy and concise manner,” said Scott Collins, Vice President of Alliances at Teradata. “The IPLocks Information Risk Management Platform provides Teradata customers with the ability to maintain high levels of performance while complying with increasingly complex regulations.”

“We look forward to working closely with Teradata,” said Akio Sakamoto, President, CEO and Co-founder of IPLocks. “More than ever before, securing information assets from negligent and malicious acts is crucial to organizations. This partnership draws on our expertise in information security and Teradata’s reputation as the leader in enterprise analytics and enterprise data warehousing. Together, we can meet customers most sophisticated information management needs.”

IPLocks will be participating in the Teradata Universe in Tokyo from March 10-11. Sales teams from IPLocks and Teradata have already started joint efforts promoting the platform to enterprises in Japan that want to build a more robust information risk management framework to meet the requirements of the Personal Information Protection Act that will become effective on April 1, 2005.

### **About IPLocks**

IPLocks, Inc. protects business continuity, safeguards company brand reputation and eases the pain of corporate governance by securing critical information assets from negligent and malicious acts. The IPLocks Information Risk Management Platform alerts management to information risks from security and business policy violations, attacks on data, compromised structural integrity and information theft, which other security solutions fail to detect. IPLocks secures business critical data for financial services, telecommunications, media services, healthcare, public utilities and other industries. Founded in 2002, San Jose, California-based IPLocks is a privately held global corporation with customers throughout North America, Asia Pacific, South America and Europe. For additional information, visit [www.iplocks.com](http://www.iplocks.com).
