**IPLOCKS UNVEILS DATABASE SECURITY AND COMPLIANCE
SOLUTION VERSION 6.0**

New Version Includes Pre-packaged Compliance Reports and Tools, Automated Decision Making and Expanded IBM Support

SAN JOSE, Calif., Oct. 11, 2006 — IPLOCKS™, a leading provider of database security and compliance solutions that protect business critical information, today announced the availability of IPLOCKS Database Security and Compliance Solution Version 6.0. The latest version adds pre-packaged SOX and compliance report templates, enhanced custom compliance reporting capabilities, performance enhancements for high transaction environments and support for additional IBM platforms.

“Meeting regulatory compliance is of increasing importance to organizations of all sizes,” said Akio Sakamoto, president, CEO and co-founder of IPLOCKS. “Companies now realize the key role that IT infrastructure plays in attaining and maintaining compliance. The majority of financial processes are automated within financial software and a database is at the heart of these systems. The IPLOCKS solution helps customers achieve compliance, but more importantly, it helps companies sustain compliance. Continuous monitoring of key controls allows companies to identify issues throughout the year, enabling quick resolution and reducing expensive, time-consuming mitigation procedures.”

Key New Functionality in IPLocks Version 6.0

- New report capabilities including pre-packaged SOX report templates and a custom report engine to consolidate and extract information easily, saving time and money.
- Performance and usability enhancements including Audit Trail Filter and a SQL Capture Filter for high-transaction environments and ease of product administration.
- New rule chaining enables real-time, automated intelligent decision-making for responding to suspicious activities and terminating sessions to provide stronger ties to workflow and ticketing systems.
- Enhanced IBM Stack adds support for WebSphere and DB2 Universal Database (UDB) repository and modifications that enable the IPLocks solution to take advantage of DB2 performance enhancements.

IPLocks automates, consolidates and enforces key internal controls through on-going monitoring, analysis and reporting of databases, while reducing costs to efficiently sustain compliance. The IPLocks Database Security and Compliance Solution is the only patented, comprehensive data protection and compliance enforcement solution that assesses for vulnerabilities, monitors user behavior activity and provides an independent audit analysis to support and sustain compliance. It provides organizations with competitive agility by managing risk, and reducing the time, effort and expense associated with database compliance enforcement and data protection.

About IPLocks

IPLocks, Inc. is the leading provider of database security and compliance solutions. The company works with enterprises, service providers, and solution providers worldwide to protect critical information assets from negligent and malicious user threats, to manage database security policy vulnerabilities, to ease the pain of compliance and to protect privacy. San Jose, California-based IPLocks is a privately held global corporation with customers throughout North America, Asia Pacific, South America and Europe.
