**FOR IMMEDIATE RELEASE**

**INFO SECURITY PRODUCTS GUIDE NAMES IPLOCKS AN  
INFO SECURITY “HOT COMPANY” FOR 2006**

**SAN JOSE, Calif. – January 31, 2006** – Info Security Products Guide, the world’s leading publication on security-related products and technologies, has named IPLOCKS™ one of its Info Security “Hot Companies” winners for 2006. A team of industry experts evaluated more than 600 companies worldwide, looking for the top security organizations that meet its rigorous ‘4P’ criteria: products, people, potential and penetration.

“IPLOCKS’ placement on the “Hot Companies” listing further reinforces our position as the enterprise database security solution of choice,” said Akio Sakamoto, president, CEO and co-founder of IPLOCKS. “With the increased sophistication of hackers, abuse from internal, trusted employees and increased regulatory requirements, organizations across the globe are more vulnerable to data breaches than ever. We are committed to providing the most comprehensive and automated database security software solution for data protection, privacy and regulatory compliance.”

"The goal of the annual ‘Hot Companies’ listing is to provide end users with the most effective and easily deployable solutions that address the next generation of highly sophisticated and blended attacks,” said Rick Justice, chief editor of the Info Security Product Guide. “In order for enterprises to fully protect their information assets, they need to take a wider approach in securing against all types of possible threats – especially

those presented by internal trusted employees. Database security products, such as those offered by IPLocks, are key components of a complete security infrastructure.”
