**Info Security Products Guide Recognizes IPLOCKS as  
Hot Security Company for 2007**

*IPLOCKS Named "Hot Company" Leading the World of Security  
for Second Consecutive Year*

**SAN JOSE, Calif., Jan. 31, 2007** — IPLOCKS™, a leading provider of database security and compliance solutions that protect business critical information, today announced that Info Security Products Guide, the world's leading publication on security-related products and technologies has named IPLOCKS as one of its Info Security "Hot Companies" winners for 2007.

Selected from an industry analysis of more than 500 prominent information security vendors, winners of this prestigious honor are chosen based upon a stern selection criteria of 4Ps. Nominees are evaluated on Products, People, Performance and Potential behind their growing success. The Hot Companies selection helps raise the bar significantly for the industry to provide end-users with effective and deployable protective solutions against the next generation of highly sophisticated and blended attacks.

The IPLOCKS Database Security and Compliance Solution focuses on three key areas including SOX compliance, IT internal controls and database security, to help companies meet compliance, ensure the integrity of their data and protect against both internal and external threats.

“Security is now one of the top three issues with almost every organization around the world,” said Rake Narang, managing editor of Info Security Products Guide published by Silicon Valley Communications. “Companies such as IPLocks that are building their success strategy based on the four pillars of strength that we used as evaluation criteria are the companies that are best positioned to keep your digital resources secured in 2007. IPLocks is a key player in the database security and compliance field.”

“We are honored to receive the ‘Hot Company 2007’ recognition by Info Security Products Guide for a second consecutive year,” said Alan Shoap, COO at IPLocks. “This award validates our position as a company with a successful strategy of enabling our customers’ to achieve regulatory compliance through proactive database security.”

#### **About Silicon Valley Communications Awards**

Info Security Products Guide, published by Silicon Valley Communications, plays a vital role in keeping end-users informed of the choices they can make when it comes to protecting their digital resources. It is written expressly for those who are adamant on staying informed of security threats and the preventive measure they can take. You will discover a wealth of information in this guide including tomorrow's technology today, best deployment scenarios, people and technologies shaping info security and independent product evaluations that facilitate in making the most pertinent security decisions. The Info Security Products Guide Awards recognize and honor excellence in all areas of information security.
