

IPLOCKS and Bluecheck Bring Data Security to Organizations in Italy and Switzerland

Distribution Agreement Expands IPLOCKS European Presence & Goals for Worldwide Growth

San Jose, Calif. and Milan, Italy – October 8, 2007– IPLOCKS™, whose award-winning software is *Keeping Data Safe* for companies around the world (www.iplocks.com) and Bluecheck, a leading provider of database security and compliance software (www.bluecheck.it), today announced an agreement enabling Bluecheck to distribute IPLOCKS solutions. The contract enables Bluecheck to offer its extensive customer base complete compliance and database security solutions with IPLOCKS vulnerability assessment, compliance, and privacy/security tools.

“Keeping data safe is a global concern,” said Massimo Turchetto, Vice President of Sales, Bluecheck. “IPLOCKS tools will address client concerns over data breaches, fraud, and identity theft by first assessing databases for vulnerabilities. Data is then protected with highly automated monitoring and auditing tools to ensure policy compliance.”

IPLOCKS launched its global channel program earlier this year in Europe and has been aggressively selecting partners in strategic, high growth geographic markets. The program now includes resellers and distributors in key South American, European, Asian and Middle Eastern regions.

“Bluecheck is highly regarded in the enterprise security market,” said David Mills, Vice President of Sales, IPLOCKS. “The company’s expertise in data security and reputation for superior sales and service, combined with IPLOCKS award-winning tools, provides businesses with an excellent ROI.”

IPLocks

IPLocks, Inc.'s award-winning software is keeping data safe for companies around the world. From hardening databases against attacks to real-time activity monitoring, IPLocks is the solution to compliance and database security needs.
